

Wells Harbor Topographical Map

Webhannet River Boat Yard-Kayak rental location and launch

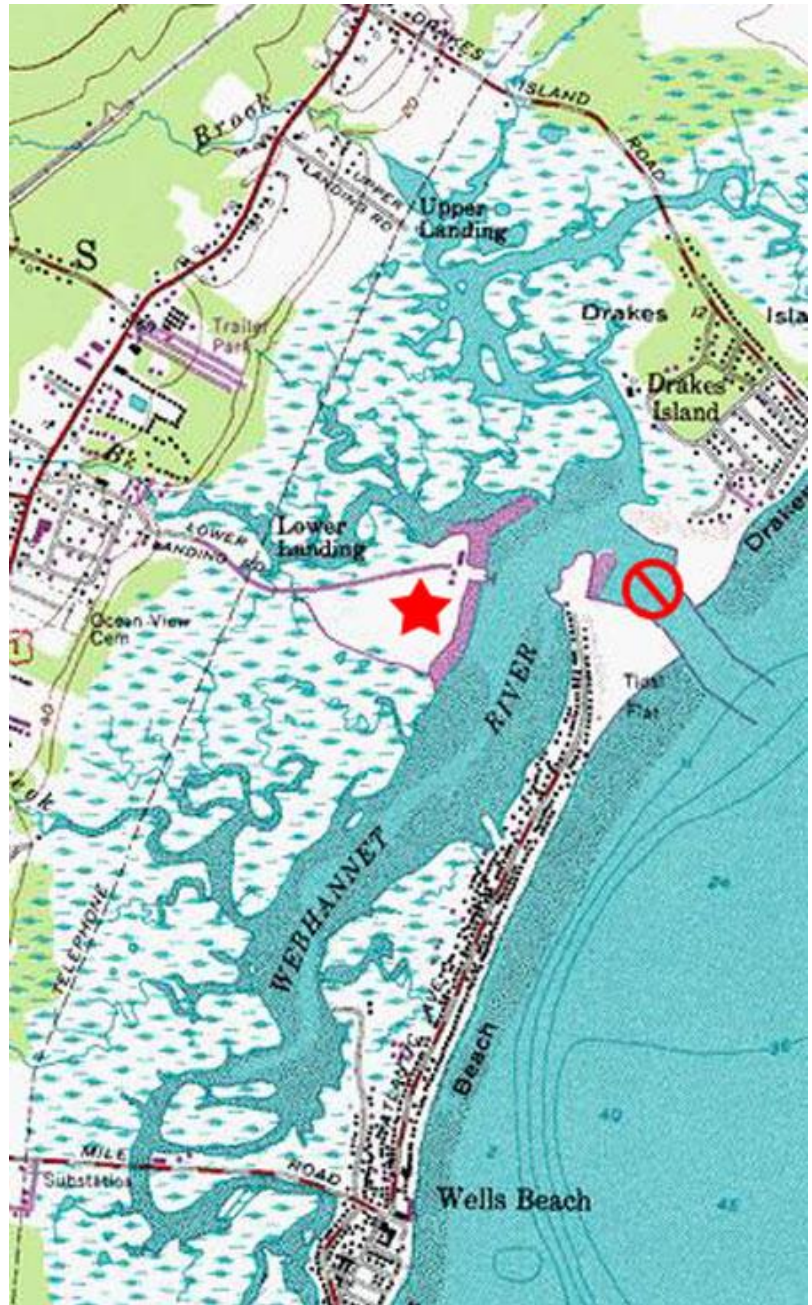

Entrance to the Wells Harbor Jetty-open ocean-this area is **off limits** to customers renting kayaks

When I describe “going to the right” you would be heading toward the bottom of this map- toward Mile Road where the wide part of the river runs, and the words Webhannet River are printed. We refer to this direction as the **“Destination Paddle”**, most customers’ journey to the bridge as their destination.

When I describe “going to the left” you would be heading toward the top part of the map, where it shows the two main branches of the estuary, labeled Lower Landing and Upper Landing. Lower landing follows Harbor Road and Upper Landing heads toward Drakes Island Road. We refer to this direction as the **“Marsh or Estuary Paddle”** it is usually a good place for beginners as the meandering paths are narrow and shallow. You are very likely to see wildlife and birds in this direction.

Hope this helps to orient you with Wells Harbor before your visit. When you come to rent, we show you this map in a much larger version; along with an overhead photo of the harbor. We discuss landmarks and give you the best advice for your specific group to enjoy the harbor.

We can't wait to get you on the River!
